

# Home Fire Sprinklers Save Lives

**Fire sprinklers protect your home and your family. Learn the facts:**

- Home fire sprinklers keep fires small by reducing the heat, flames and smoke made in a fire.
- Only the home fire sprinkler closest to the fire will spray water.
- Home fire sprinklers put much less water on the fire than a fire department hose.
- Home fire sprinklers can be installed in new and already built homes. Install a home fire sprinkler system if you are remodeling or building a home.

*Fire sprinklers  
and smoke alarms  
reduce your risk of  
dying in a fire by  
82 percent.*
